

Training suitability

This qualification is suited to applicants who are responsible for the operational management of a medical practice, and working under the guidance of a practice manager or principal. It is targeted towards a range of health-based practice-types, for example general practice, allied health practices, physiotherapy, chiropractic, medical specialist and group practices.

This qualification addresses the daily operations of a practice with a strong focus on staff management and supporting client/patient needs complemented by an understanding of risk management and compliance.

Skill outcomes

On successful completion of this course, students will have the skills to:

- understand personal skills and where you fit into the workplace
- assess the role that risk management plays in a 21st century practice
- understand the financial aspects of the practice as a business, especially the information conveyed in financial statements
- analyse client/patient needs and develop strategies to improve services in response to change
- implement operational plans to meet the practice's vision and goals
- apply a continuous process of review and improvements across all aspects of the practice
- lead and communicate with a diverse team of people to more effectively achieve the best results for your practice.
- understand the importance of a business vision and goals and demonstrate how these are used to set the direction for staff in the workplace.

- Lead effective workplace relationships (BSBLDR402)
- Communicate effectively as a workplace leader (BSBLDR401)
- Implement and monitor WHS policies, procedures and programs to meet legislative requirements (BSBWH5401)

Module descriptions

Taking control of your career

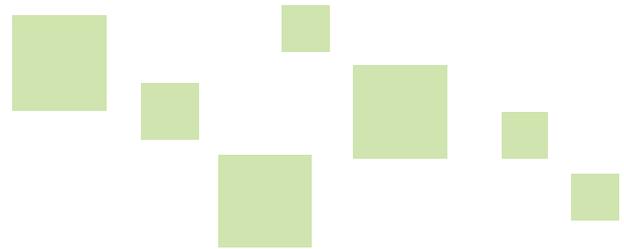

Following an introduction to the certificate course, this module focuses on understanding your own work style and skills and how these fit into the business of the practice.

WHS, risk and compliance

Practices have to deal not only with the issues of medico-legal risk but increasingly with business risk. This module provides an overview of risk management and the tools available. Compliance with government and professional body regulation is now a routine part of professional practice. The module also introduces many techniques to help your practice in this vital area.

Customer service

In professional practice it is important to understand patient needs, appreciate how the marketing effort can be used to meet these needs and then put in place systems to monitor and improve on service levels.

Business management systems and operations

The final module brings together aspects of financial reporting, operational management and implementation of plans with a focus on continuous improvement. The links between people, good practice and planning are explored.

Leading effectively

This module covers developing team cohesion, building trust and managing team relationships.

Effective communication in leadership

This module teaches the skills to lead teams and individuals through informed decision making, enhancing the organisation, leading by example and communicating effectively.
